

2019 Safe Patient Handling & Mobility/Falls Conference:

Realizing your Passions in Research, Education, Innovation and Technology

MARCH 4-8, 2019

ROSEN CENTER, ORLANDO, FL

This conference will provide participants with cutting edge research, best practices, and lessons learned in safe patient handling and patient fall and fall injury prevention. This conference includes diverse learning opportunities, including plenary sessions, concurrent sessions, workshops, “hands on” practice sessions, and a large exhibit hall with new and emerging technologies. Innovations will be presented addressing such topics as safety legislation, practice tips, technology solutions, effective training techniques, successful organizational strategies, and building a business case. This conference is designed to meet the needs of direct health care providers, managers, administrators, risk managers, educators, industrial hygienists/safety professionals, and researchers of any discipline who are interested in advancing safety for patients and caregivers.
